

SIRCO VM1

Manually operated Transfer Switching Equipment
from 63 to 125 A

Transfer switches

SIRCO VM1
I-0-II 4-pole 100 A

The solution for

- > Energy production
- > Critical buildings

Strong points

- > Safe isolation
- > Modular product

Conformity to standards

- > IEC 60947-3

Function

SIRCO VM1 are 3 or 4 pole modular manual transfer switches with visible breaking. They provide on-load transfer between two sources for any low voltage power circuit, as well as safety isolation. Other applications include source inversion (e.g. to change the direction of a motor) or grounding/earthing.

Advantages

Safe isolation

SIRCO VM1 transfer switches enable completely secure isolation owing positive break indication and double visible breaking. The user can view the status of the device either during preventive checks or before working on the system.

Modular product

SIRCO VM1 transfer switches offer a number of mounting options: DIN rail, back plate or modular panel-mounted.

Configurations

Functional diagram (for further details see the installation instructions supplied with the product).

1. Direct front operation
2. External front operation
3. Pre-breaking and signalling
NO/NC auxiliary contact blocks
4. Bridging bars
5. Backplate or snap-on DIN-rail mounting.

External operation handle

Use

Door interlocked external front operation handles include an escutcheon, are padlockable and must be utilised with an extension shaft.

Type S handle adapter

Use

Enables S-type handles to be fitted in place of existing older style SOCOMEC handles. Adapter can also be utilised as a spacer to increase the distance between the panel door and the handle lever. Dimensions: adds 12 mm to the depth of the handle.

IP20 bridging bar

Use

For creating a common connection between switches I & II, on the top or bottom side of the SIRCO VM1, to enable, for example, the load to be fed from either incoming source (I or II).

The bridging bar does not reduce the connection capacity of the cage clamp terminals.

Rating (A)	No. of poles	Reference

63 ... 125	4 P	4499 4006

NO/NC auxiliary contact

Use

Pre-breaking and signalling of positions I and II: 1 NO/NC auxiliary contact for each position.

Characteristics

- Snaps on and is secured by a screw.
- Connector block with a maximum capacity of up to 2 x 1.5 mm² per terminal.

Rating (A)	Switching type	Contact(s)	Reference
63 ... 125	I - 0 - II	1	4439 0001 ⁽¹⁾

(1) Not available for overlapping contact switch (I-I+II-II).

Enclosed solutions

General characteristics

- Operating handle: S-type padlockable black handle.
- Protection degree: IP54 / IK 09.
- Colour: RAL 7035
- Closing plates: top and bottom.
- Material: 1.5 mm thick XC steel.
- Coating: epoxy polyester powder.
- Wall mounting: 4 mounting brackets supplied (not fitted).
- Door: solid with hinges.
- Locking device: 3 mm double bar key (key supplied).
- Miscellaneous: 2 earth connection bolts, double door locking.
