

Product Environmental Profile

Master cabinet

Control command cabinet

The commitments of Socomec to respect the environment

As part of its environmental policy, Socomec is committed to:

- Incorporate the principles of the circular economy into the design of new products and services
- Promote longer product lifetimes
- Promote the use of environmentally responsible materials
- Design and develop solutions to further improve the energy efficiency of our products and services
- Inform our customers in a transparent manner about the environmental impact of our products throughout their life cycle.

To this end, Socomec is committed to constantly monitoring, anticipating and complying with environmental regulations as well as customer expectations relating to its products, and to ensuring that all those involved adhere to and take responsibility for its commitments.

Socomec is member of :

ecosystem

Member of de WEEE Europe

Gimélec

Environment and sustainable development commissions

Innovative Power Solutions

• Product information :

Reference product

The representative product is the Master cabinet with sales reference 7423106A0000000 with the following description:
Control command cabinet

References covered by this PEP :

7423106A0000000 Master cabinet

Functional unit

To ensure the control of the whole energy storage system while ensuring auxiliaries supply up to 85kW for a service life of 10 years.

• Materials and substances

Declaration of the constitutives materials according to IEC 62474

Total mass of the reference product (including packaging): 426 kg among which packaging: 125 kg

For the Master cabinet

Metals % weight		Plastics %weight		Others % weight	
Aluminium and its alloys	29,3%	Others thermoplastics	4,9%	Other organics	27,7%
Other ferrous alloys - non stainless steels	17,1%	PVC	1,5%	Other inorganics	2,0%
Copper and its alloys	8,8%	Other plastics	1,0%	Ceramics and glass	0,6%
Other non-ferrous metals and alloys	6,7%				
Zinc and its alloys	0,1%				
Stainless steel	<0,1%				
Nickel and its alloys	<0,1%				
Precious metals	<0,1%				
Magnesium and its alloys	<0,1%				

Substances management

Socomec is leading a program to limit the use of hazardous substances in the design of new products and to monitor the presence of substances of concern in its supplies to anticipate future use restrictions.

Directive 2011/65/EU : Product references covered by this PEP meet the requirements of the RoHS Directive on the restriction of substances such as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyl (PBB), polybrominated diphenyl ethers (PBDEs) and phthalates (DIBP, DEHP, BBP, DBP).

As per article 33 of REACH, we declare SVHC's contained in the product:

SVHC	CAS number	Inclusion date in candidate list	SVHC included in annex XIV (authorisation list)
Lead	7439-92-1	June 27th 2018	No

REACH 1907/2006 regulation: To the best of our knowledge, based on the supplier declarations, at the publication date of this document, the product do not contain any other SVHC in a concentration above 0,1% per weight.

● Manufacturing

The products covered by this PEP are manufactured on the production site of Huttenheim, France whose environmental management system has been ISO 14001 certified. Impacts on the environment are reduced by optimizing its energy consumption and by practicing a rigorous waste management.

● Distribution

As part of its distribution policy aiming to respect the environment, Socomec is in favor of groupage transports and ISO 14001 certified logistic partners.

No reconditionning is planned for the product. This phase is consequently neglected.

The sizing of the packaging has been optimized to ensure the best possible protection of the product at the lowest possible volume in order to reduce the impact of the transport stage on the environment.

● Installation

The installation stage consists in connecting the product to the existing electrical installation.

The installation does not generate any significant impacts on the environment, except impacts from packaging waste.

● Use phase

Consumption scenario

Use phase scenario: European energy mix

Mode	Power consumption of the reference product (W)	Load rate (%)	Time distribution (%)
Active	2678	100	100

Product power consumption during its total lifespan (10 years): 234593 kWh

Care and maintenance

It is recommended to carry out periodic specialized maintenance in order to keep the equipment at the maximum level of efficiency and to avoid the installation being out of service with possible damage/risks.

Components	Power supply	UPS
Maintenance frequency	1	3

For the HVAC a loss of 10% of refrigerant (R-134a) per year has been modelised.

Consumables

The product does not require consumables.

• End of life

End of life treatment

The following parts require specific care and selective treatment in accordance with Annex VII of the WEEE Directive 2012/19/EU - Waste of electrical and electronic equipment. Maintenance and disassembly should always be conducted by qualified personnel.

Item	Part mass	Location
LCD SCREEN	4.05 kg	1
HVAC	36 kg	2
PCBA	7.32 kg	3
LEAD BATTERY	10 kg	4
FANS	3.6 kg	5

Recovery potential of the product according to IEC TR 62635

The recovery potential of the product is 84,1%.

This covers material and energy recovery potentials.

• Environmental impacts

Calculation methodology: life cycle assessment (LCA)

The calculation of the impacts on the environment was made using a life cycle assessment methodology in accordance with the ISO 14040 requirements and with PEP eco passport product category rules. For more details follow the link:

www.pep-ecopassport.org

This study was carried out with the following version of the software EIME and of the database:

EIME version: EIME© v5.9.4

Database version: CODDE-2022-01

The whole life cycle has been taken into account:

Step	Geographical representativeness	Scenario
Manufacturing (M) (A1-A3)	Production of electronic components : Asia Production of other components and packaging : Asia Assembly : France	From the raw material extraction to the last Socomec logistic platform, including packaging Waste generated during manufacturing phase are taken into account.
Distribution (D) (A4)	Distribution scenario : Europe	From the last Socomec logistic platform to the final customer. No reconditionning.

PRODUCT ENVIRONMENTAL PROFILE

Installation (I) (A5)	Transport and treatment of packaging wastes : Local	Local road transport of 1000 km of generated wastes to the treatment site, end of life treatment.
Use phase (U) (B1-B7)	Energy mix : Europe	Power consumption required during 10 years and maintenance according to consumption scenario above mentioned.
End of life (EOL) (C1-C4)	Transport and treatment : Local	Road transport of 1000 km from the final customer to the treatment sites. End of life treatment.

Environmental impacts of the Master cabinet

The following impacts have been calculated to best represent geographically, temporally and technologically each step of the life cycle.

Indicators	Unit	Total impact	M (A1-A3)	D (A4)	I (A5)	U (B1-B7)	EOL (C1-C4)
Resource use, minerals and metals (Abiotic resource depletion – Elements)	kg Sb eq.	5,69E-01	3,61E-01	0*	0*	2,08E-01	0*
Resource use, fossils (Abiotic resource depletion – Fossil fuels)	MJ	2,09E+06	7,06E+04	3,14E+03	3,35E+02	2,02E+06	7,30E+02
Acidification	mol H+ eq.	6,10E+02	4,25E+01	1,43E+00	1,94E-01	5,66E+02	3,38E-01
Ecotoxicity, freshwater	CTUe	9,43E+05	2,72E+05	1,52E+02	0*	6,70E+05	2,22E+02
Human toxicity, cancer	CTUh	4,98E-03	4,94E-03	0*	0*	4,55E-05	0*
Human toxicity, non-cancer	CTUh	9,77E-04	2,28E-04	4,29E-07	3,13E-07	7,49E-04	1,46E-07
Eutrophication, freshwater	kg P eq.	3,83E-02	1,94E-02	8,45E-05	1,02E-03	1,31E-02	4,73E-03
Eutrophication, marine	kg N eq.	8,10E+01	4,44E+00	6,69E-01	8,79E-02	7,56E+01	1,51E-01
Eutrophication, terrestrial	mol N eq.	8,80E+02	4,85E+01	7,34E+00	9,01E-01	8,22E+02	1,61E+00
Climate change - total	kg CO2 eq.	1,33E+05	4,09E+03	2,26E+02	2,52E+02	1,29E+05	5,86E+01
